

# Remember

On admission all patients should  
have their blood glucose tested  
within one hour.

# Remember

Listen to the Expert.

People with diabetes deal with the  
condition every day of their lives.

[www.institute.nhs.uk/thinkglucose](http://www.institute.nhs.uk/thinkglucose)

# Remember

People with diabetes stay in hospital for up to 2.6 days longer in some specialities than those without diabetes.

Include diabetes in all your assessments and help reduce this difference.

# Remember

Co-ordinate food and medication to  
maximise diabetes control.

For people with diabetes, the timing  
and content of their meals is as  
important as the timing and  
type of medication.

# Remember

Over one in ten patients that you look after in this hospital will have diabetes.

It's everyone's job to take active responsibility for inpatient diabetes care.
